Education

University of Guelph

Expected Graduation, May 2027

Bachelor of Computing in Software Engineering, Minor in Entrepreneurship.

Guelph, Ontario

- **Relevant Coursework:** Software Engineering, Object-Oriented Programming, Data Structures & Algorithms, Discrete Math, Linear Algebra, Calculus, Software Design, Web Development, Operating Systems, Statistics, System Design.

Technical Skills

Languages: Python, SQL, Java, HTML/CSS, JavaScript/TypeScript, Bash/Shell, C++, C, Assembly, VBA.

Frameworks & Libraries: Angular, React.js, Next.js, Spring Boot, Node.js, React Native, Tailwind CSS.

Developer Tools: Claude AI, OpenAI, Google Cloud, VS Code, JUnit, Docker, REST API, UI/UX, Linux, Git, Github, GitLab, Azure, Firebase, Jira, Trello, AVEVA PI Asset Framework, PI Vision, Easy68k, MongoDB, Supabase, Postman.

Other Skills: IT support, Microsoft Fabric, Power BI, Microsoft Office (Excel, PowerPoint, Word), Analytics, Project Management, System Testing, Agile, Scrum, Sprints, Leadership, Problem-solving, Communication.

Professional Experience

Software Engineer Intern

April 2026 – Present

The Simple Knot Inc.

Guelph, Ontario

- Building a cross-platform iOS & Android app from scratch using **React Native (Expo)** and **NeonDB**, enabling couples to discover and share wedding decoration inspiration **without external back-and-forth**.
- Integrating **Instagram** and **Pinterest** share extensions to let users send reels and pins directly into the app, eliminating manual link copying.
- Conducting user testing with **300+ users** to validate product-market fit and iterate on UX flows prior to launch.

Software Developer Intern

May 2024 – Aug 2024

Algoma Steel Inc.

Sault Ste. Marie, Ontario

- **Developed** and **deployed** a **mobile and tablet-responsive data visualization interface** using **AVEVA PI Vision**, enabling on-site operators to securely access real-time operational data across multiple device types.
- **Designed** and implemented custom **PI Vision dashboards** by aggregating high-priority tags, KPIs, and alarms, **reducing screen-switching** and improving on-site engineers' workflow efficiency by **40%**.
- **Diagnosed** and **resolved** critical data discrepancies in migrated PI Vision screens by debugging legacy **VBA scripts**, improving data accuracy by up to **70%** and ensuring reliable real-time monitoring for operations teams.

Projects

Archr 🌐 🔄 | Next.js, TypeScript, Tailwind CSS, Gemini API, Google Calendar API, Supabase

Feb. 2026 – Present

- Built a course outline parser using **Gemini API** that extracts assignment deadlines and auto-populates them into **Google Calendar**, eliminating manual date entry for students.
- Engineered an **AI-powered subtask scheduler** that breaks down assignments into **time-blocked calendar** events based on a user-uploaded task description, helping users avoid last-minute cramming.
- Implemented **bi-directional Google Calendar sync** with automated schedule recovery, ensuring subtasks dynamically reschedule around real-time calendar conflicts.

ExcelGPT 🌐 🔄 | React.js, Python Flask, Pandas, Gemini API, TailwindCSS

Oct. 2025 – Dec. 2025

- Built and deployed a full-stack AI web app allowing users to query spreadsheet data in plain English using **Gemini API**, cutting analysis time compared to manual Excel workflows.
- Architected a **Python Flask** REST API backend on Render to handle file parsing via **Pandas**, serving a **React.js** frontend deployed on Vercel with sub-second query response times.

Leadership Experience

Director of Finance

Sept. 2025 – May 2026

Google Developer Groups

Guelph, Ontario

- Led a team of **4 finance members** to raise **\$7,200+** in sponsorship funding for the **GDG Hackathon**.
- Initiated outreach to **100+ companies** and attended meetings to **negotiate sponsorships**, securing commitments and partnerships to support event logistics and prizes.
- Oversaw **end-to-end event logistics** and successfully hosted a **250-person hackathon** in University of Guelph.
