Education

University of Guelph

Expected Graduation, May 2027

Bachelor of Computing in Software Engineering, Minor in Entrepreneurship.

Guelph, Ontario

- **Relevant Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Discrete Math, Linear Algebra, Calculus, Software Design, Web Development, Operating Systems, Statistics.

Technical Skills

Languages: Java, HTML/CSS, JavaScript/TypeScript, Python, Bash/Shell, C++, C, Assembly, VBA, SQL.

Frameworks & Libraries: Spring Boot, React.js, Next.js, Node.js, React Native, Tailwind CSS.

Developer Tools: VS Code, JUnit, Docker, REST API, UI/UX, Linux, Git, Github, GitLab, Azure, Google Cloud, Firebase, Jira, Trello, AVEVA PI Asset Framework, PI Vision, Easy68k, Netlify, Vercel, Figma, MongoDB, Supabase, Postman.

Other Skills: IT support, Analytics, Project Management, System Testing, Agile, Scrum, Sprints, Microsoft Office, Organization, Leadership, Problem-solving, Communication.

Professional Experience

Quality Assurance Test Handler

May 2025 – Aug 2025

Algoma Steel Inc

Sault Ste. Marie, Ontario

- Collected and processed **50+ production steel samples per shift** in accordance with system-defined quality requirements and specifications.
- Maintained and validated **large volumes of sample records** in internal databases, supporting audit readiness and reporting accuracy.
- Improved operational efficiency by standardizing tracking procedures, **reducing data inconsistencies** and misplaced samples by **25%**.

Software developer Intern

May 2024 – Aug 2024

Algoma Steel Inc

Sault Ste. Marie, Ontario

- **Developed** and **deployed** a **mobile and tablet-responsive data visualization interface** using **AVEVA PI Vision**, enabling on-site operators to securely access real-time operational data across multiple device types.
- **Designed** and implemented custom **PI Vision dashboards** by aggregating high-priority tags, KPIs, and alarms, **reducing screen-switching** and improving on-site engineers' workflow efficiency by **40%**.
- **Diagnosed** and **resolved** critical data discrepancies in migrated PI Vision screens by debugging legacy **VBA scripts**, improving data accuracy by up to **70%** and ensuring reliable real-time monitoring for operations teams.

Projects

Intelligent Tutoring Systems 🌐 | React, Tailwind CSS, Django, Scikit-Learn, OpenAI

Sept. 2025 – Dec. 2025

- Led a team of **8 developers** by managing tasks and leveraging individual strengths to efficiently build a **Machine Learning** Intelligent Tutoring System.
- Developed **Machine Learning Model** using **Python**, **Scikit-Learn**, and **OpenAI API** to assess learner mastery levels, achieving **85% prediction accuracy** on validation data.
- Designed a responsive **UI/UX prototype in Figma**, collecting feedback from **15+ users** and iterating on designs to improve task completion time by **30%**.

ExcelGPT 🌐 | React, Tailwind CSS, Python Flask, Matplotlib, Google Gemini API, Git

Oct. 2025 – Nov. 2025

- Developed an AI-powered tool that analyzes Excel spreadsheets using **Python Flask** and **Google Gemini API**, automated data parsing to reduce manual analysis time by **60%** for users.
- Implemented **data visualization** features with **Matplotlib** to provide users with interactive and interpretable insights from their datasets.

Leadership Experience

Director of Finance

Sept. 2025 – Present

Google Developer Groups

Guelph, Ontario

- Leading a team of **4 finance members** to raise sponsorship funding for the **GDG Hackathon**.
- Initiated outreach to **100+ companies** and attended meetings to **negotiate sponsorships**, **securing commitments** and **partnerships** to support event logistics and prizes.
